

Name	Dust	Front Profile	Side Profile
ID Number	629		
Transponder	977 2000 0751 5146		
Date of Birth	16-09-09		
Sire	Kenya		
Dam	Finita		

Physical Characteristics

- Sleeker build than the other females.
- Defined brow.
- More visible muscle definition.
- Darker coat.
- Kink in end of tail.
- Smaller tassel at the end of the tail than rest of pride.

Behavioural Characteristics

- Independent, often can be seen slightly separate from the pride but is not antisocial and has a good relationship with conspecifics.
- Not usually antagonistic and rarely insights aggression but will defend herself aggressively when necessary.
- Not usually the target of aggression from conspecifics.
- Investigative and naturally enjoys interacting with enrichment.
- Well bonded with Ted, the two often prefer to be together.
- Occasionally required more management than others when bringing into the compound.
- Proficient at climbing trees, often hunts pheasants / pigeons in the reserve.

Name	Jasmin	Front Profile	Side Profile
ID Number	210		
Transponder			
Date of Birth	26-03-07		
Sire	Kenya		
Dam	Freya		

Physical Characteristics

- Large build - 2nd largest female.
- Light coloured coat.
- Narrow shape to eyes.

Behavioural Characteristics

- A dominant member of the pride.
- Rarely instigates aggressive interactions.
- Rarely the target of aggression.
- Enjoys chasing staff vehicles.
- Proficient at climbing trees.
- Often observed hunting pheasants and pigeons in the reserve.

Name	Handaya	Front Profile	Side Profile
ID Number	507		
Transponder			
Date of Birth	16-09-08		
Sire	Kenya		
Dam	Freya		

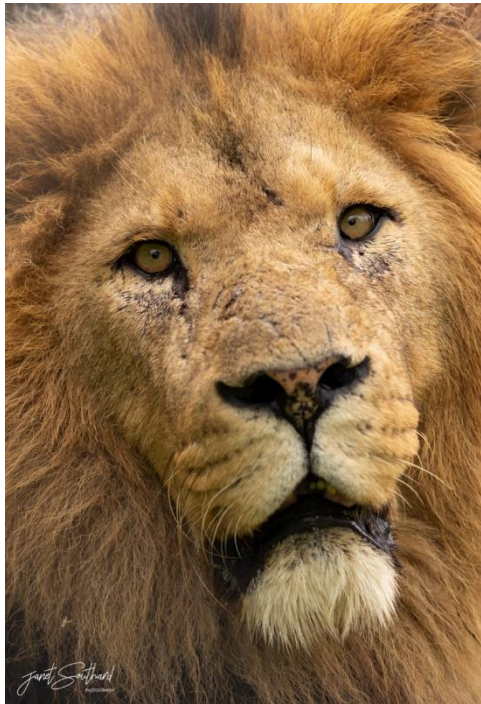

Physical Characteristics

- Large build - largest of the females
- Light coloured coat
- Rounder shape to eyes compared to Jasmin
- Occasionally unsteady gait

Behavioural Characteristics

- Quite a dominant member of the pride.
- Often instigates aggressive encounters with Savannah and Dust.
- Is often present and involved during aggressive encounters, often follows Sam's lead and can sometimes exacerbate a conflict.
- Suffers with ataxia and can occasionally be slightly uncoordinated when travelling, especially immediately after resting.
- Responsive to keeper vehicles and requires very little management when bringing into the compound.
- Very eager to get to compound as keepers are putting food in, often digging at the fence and pacing up and down.
- Occasionally climbs trees but not as often as other females, possibly due to slight incoordination.

Name	Sam	Front Profile	Side Profile
ID Number	733		
Transponder			
Date of Birth	26-03-07		
Sire	Kenya		
Dam	Jasmin		
<p>Physical Characteristics</p> <ul style="list-style-type: none"> - Large Male, last weight 210kg - Dark mane with lighter shades around the face. - Mane extends across torso and abdomen. 			

Behavioural Characteristics

- Most dominant member of the pride
- When a female is in season he will guard them aggressively from the rest of the pride and nearby keepers
- Often will target Ted when a female is in season, but also regularly chases away other females if they are too close.
- When there are no females in season Sam is most closely bonded with Ted who he will voluntarily travel, play and rest with throughout the day.
- The most nervous of the pride around keeper vehicles, and he will retreat if not given a wide berth.
- Can be highly aggressive towards keepers when he is guarding a female, often charging and swiping at the fence / mesh.
- Highly interactive with olfactory enrichment, preferring antelope dung or raw spices rubbed into hessian sacks.

Name	Savannah		
ID Number	981		
Transponder	981 0000 0445 5726		
Date of Birth	27-06-12		
Sire	Kenya		
Dam	Jasmin		
<p><u>Physical Characteristics</u></p> <ul style="list-style-type: none"> - Smallest of the females - Heavily built - Light coloured coat - Shorter nose / muzzle than other females. - Spots still visible on lower legs and abdomen. 			

Behavioural Characteristics

- Youngest and lowest ranking member of the pride
- Often the target of dominant aggression and chasing from Sam and Handaya while in the reserve (in these instances tends to retreat to the platform).
- Rarely an instigator of aggressive encounters
- The most placid of the pride around keepers, rarely any snarling or swiping.
- Independent and curious, often the last into the compound and is the least responsive to keeper vehicles
- Very playful with conspecifics
- Most closely bonded with Jasmin (her mother) and is often most comfortable when she is nearby.
- Usually has first choice of the main feed in the compound and can feed without being challenged; unusual considering the aggressive attention she receives in the reserve, but may be related to her being the youngest and still being afforded the feeding rights she had as a cub.
